

Option 1

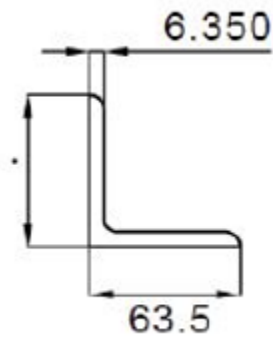

used industrial materials:

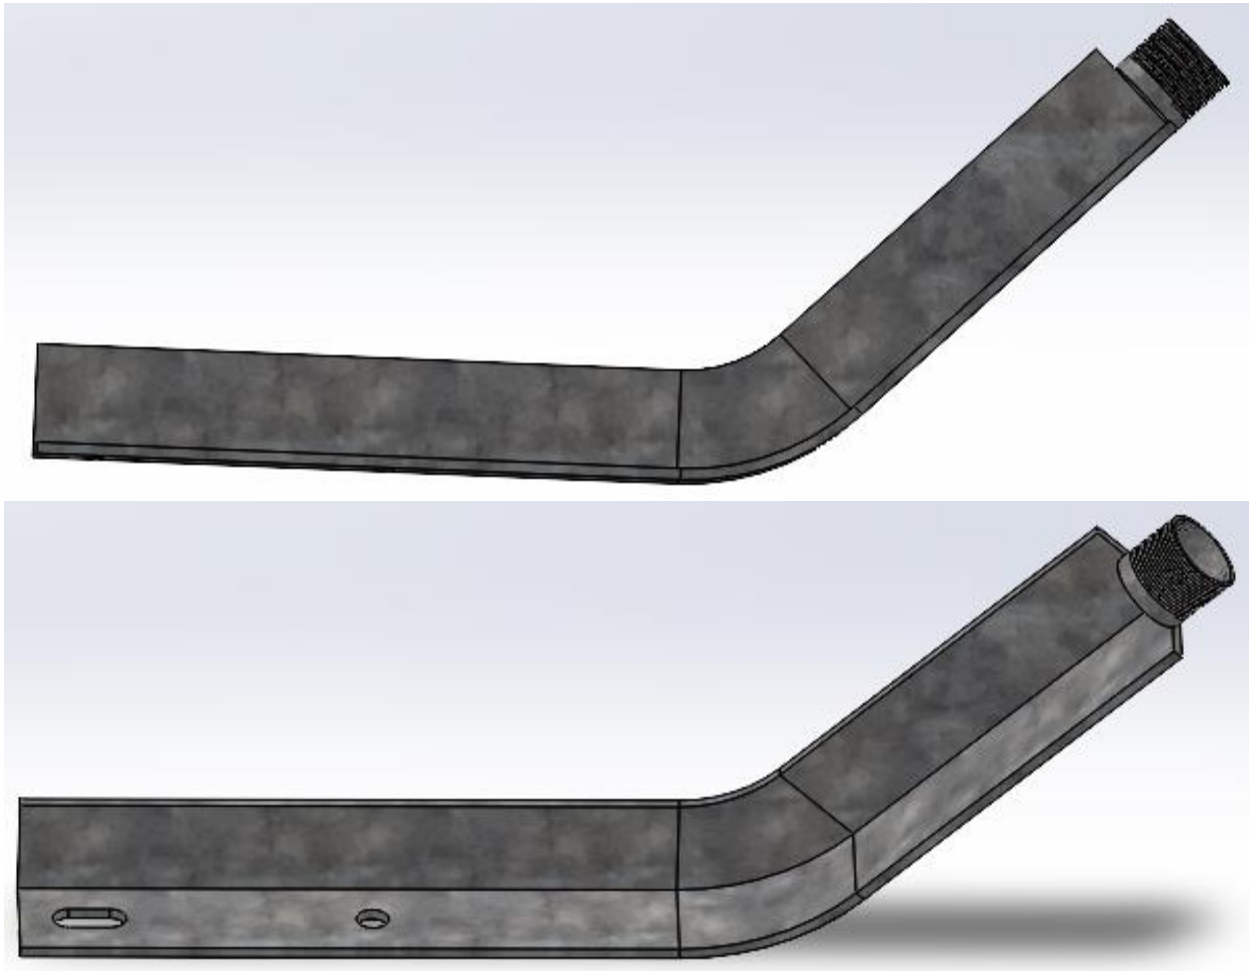

Tubo conduit galvanizado 1
1/4" x 1.5 m

5576

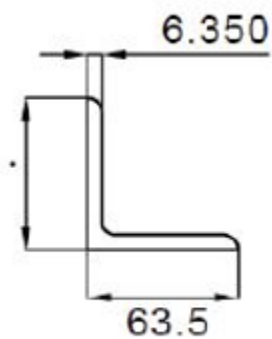

The angle you want to use is physically difficult to bend, the shape you present in the image will be difficult to achieve.

Option 2

used industrial materials: The same as in option 1

This option is the best because it is easier to fold but it has to be done in 2 parts.
